# **Consolidated Operating Results for the Fiscal Year Ended March 31, 2018 (FY2017)**

## Financial Results for FY2017

- ◆ All three businesses steadily expanded their business scale. On a consolidated Group basis, ordinary revenues rose, while ordinary profit was flat.
- ◆ At Sony Life, sales of U.S. dollar-denominated insurance were favorable, leading to a substantial increase in income from insurance premiums year on year
- ◆ The steady acquisition of new policies prompted solid growth in new business value.

## Forecast of Financial Results for FY2018

- ◆ We forecast that all three businesses will continue to expand their business scale, sustaining the growth trend. On a consolidated Group basis, we anticipate revenue and profit increases.
- ◆ At Sony Life, we expect income from insurance premiums to grow, due to solid growth in the policy amount in force, leading to higher revenues and profit. We forecast a rise in MCEV, owing to the acquisition of new policies.

## Shareholder Returns

- ◆ In line with our medium-term dividend policy, for FY2018 we expect to raise the dividend amount by ¥2.5 per share compared with FY2017, to ¥62.5, taking into overall account such factors as the operating environment, growth in business scale, and higher profit based on economic value. We aim to continue steadily increasing dividends going forward.

	Total assets		11,471.8	12,401.4	+929.6	+8.1%

- Life Insurance Business : Ordinary revenues grew year-on-year due to higher income from insurance premiums, owing to a steady rise in the policy amount in force. Ordinary profit decreased year on year due to a higher provision of policy reserve relating to the acquisition of new policies reflecting a revision in the standard yields used for calculating policy reserves and lower gains on sale of securities in the general account. On the other hand, gains/losses related to market fluctuations for variable life insurance\* improved year on year, which partially offset the negative impact of the above-mentioned decreases in ordinary profit.
  - \*Total of (a) the provision of policy reserves for minimum guarantees for variable life insurance according to market fluctuations and (b) net gains/losses on derivative transactions to hedge market risks for the products
- Non-life Insurance Business: Ordinary revenues expanded year on year, owing to an increase in net premiums written for mainstay automobile insurance. Ordinary profit increased year on year due to a decline in the loss ratio, driven mainly by a lower car accident ratio.
- Banking Business : Ordinary revenues rose year on year due to increases in interest income on loans in line with a favorably growing balance of mortgage loans and on investment securities. Ordinary profit grew year on year, due to a decrease in operating expenses, especially in advertising expenses for the card loan business.
- Ordinary revenues increased 8.8% year on year, to ¥1,503.6 billion, owing to increases in ordinary revenues from all the businesses: life insurance, non-life insurance and banking businesses. Ordinary profit increased 0.8% year on year, to ¥66.8 billion. By business segment, ordinary profit from the life insurance business decreased, ordinary profit from the non-life insurance and banking businesses rose. Profit attributable to owners of the parent was up 24.7% year on year, to ¥51.8 billion. This increase was due mainly to a gain on disposal of fixed assets from a sale of the real estate held for investment of ¥13.2 billion in the life insurance business, which was recorded in extraordinary gains.

## <Reasons for changes>

◆ Increased due to higher sales of family income insurance and U.S. dollar-denominated insurance.

◆ Decreased due mainly to lower sales of term life insurance and living benefit insurance, despite favorable sales of U.S. dollar-denominated insurance, variable life insurance and individual annuities.

- Notes:
- Figures for new policy amount, lapse and surrender amount, lapse and surrender rate, policy amount in force, annualized premiums from new policies and annualized premiums from insurance in force are calculated as the total of individual life insurance and individual annuities.
  - The lapse and surrender rate shows the ratio derived by dividing the amount of lapses and surrenders, not adjusted for policy amount decreases, increases, and reinstatements, by the policy amount in force at the beginning of the fiscal year.

## <Reasons for changes>

◆ Increased in yen ordinary deposit balance due mainly to an increase in newly accumulated funds via the increased number of accounts.

◆ Increased in foreign currency deposits, due to an increase in time deposits, led by the impact of an exchange cost campaign and promotional effect from of a rise in U.S. interest rates on US dollar-denominated time deposits.

◆ Rose due to a steady increase in mortgage loans, despite a decrease in demand for refinancing these loans.

\*1 Loans in others include corporate loans of ¥51.8 billion

\*2 Non-performing loans (loans based on the Financial Reconstruction Act) /Total loan exposure

\*3 Please refer to the graph of the non-consolidated capital adequacy ratio (domestic criteria) on page 28.

### ■ Managerial accounting basis

The following adjustments are made to the figures on a financial account for profits and losses more appropriately.

- \*1: Net interest income: Includes profits and losses associated with fund investment recorded in net other operating income, including gains or losses from currency swap transactions.
- \*2: Net fees and commissions: Includes profits and losses for customer dealings in foreign currency transactions recorded in net other operating income.
- \*3: Net other operating income: After the above adjustments (\*1 and \*2), mainly consists of profits and losses for bond and derivative dealing transactions.

### ■ Core profit

Profits and losses exclude net other operating income, which includes those on bond and derivative dealing transactions, and stands for Sony Bank's basic profits.

<u>Banking business</u>	7.1	<b>7.0</b>	<b>(2.0%)</b>
<b>Profit attributable to owners of the parent</b>	51.8	<b>55.0</b>	<b>+6.0%</b>

For FY2018, stable business growth is expected to continue in all the businesses.

### <Segment information for ordinary revenues and ordinary profit>

#### ■ Life insurance business

We forecast ordinary revenues to increase from FY2017, owing to robust income from insurance premiums.

We also anticipate a year-on-year rise in ordinary profit, stemming from an increase in profit on higher policies in force, a rise in gains on sale of securities, and an improvement in net gains/losses on derivative transactions to hedge market risks for available-for-sale securities.

#### ■ Non-life insurance business

We expect ordinary revenues to increase from FY2017, in line with growth in net premiums written, primarily for automobile insurance. Despite the higher revenues, we believe ordinary profit will be flat year on year, with the loss ratio rising slightly from FY2017, when the ratio was lower than we had anticipated.

#### ■ Banking business

We expect ordinary revenues to rise year on year due to stable business growth stemming from the ongoing steady accumulation of mortgage loans and strengthening of foreign currency business. Although we anticipate a rise in gross operating profit in line with revenue growth, we expect ordinary profit to be flat year on year, as operating expenses rise.

# Dividend Forecast for FY2018

## ■ Medium-term Dividend Policy : Unchanged

We aim for steady increases in dividends in line with earnings growth over the medium to long term, while securing sufficient internal reserves to ensure the financial soundness of Group companies and to invest in growth fields. Management will examine earnings growth over the medium to long term by placing more importance on economic value-based profit indicators that are more suitable for valuing the growth of the life insurance business, in addition to statutory profit. Furthermore, management will determine specific dividend amounts for each year by taking into account a comprehensive range of factors surrounding the Sony Financial Group.

## ■ Dividend results/forecast

Dividends for FY2017 are expected to be ¥60 per share.

For FY2018, considering the business environment, growth of our group and the level of economic value-based profit growth, we forecast dividends of ¥62.5 per share, an increase of ¥2.5 from the planned dividends of ¥60 per share for FY2017.

	FY2014	FY2015	FY2016	FY2017 (Plan)	FY2018 (Forecast)

<b>New business margin</b>	3.8%	4.6%	6.4%	6.0%	<b>6.1%</b>	<b>5.8%</b>

## ◆ Reasons for changes in MCEV

- MCEV as of March 31, 2018 increased ¥123.6 billion from December 31, 2017, due mainly to a revision in the insurance risk measurement method and favorable acquisition of new policies.

## ◆ New business value/ New business margin

- New business value for FY17.4Q (3M) was ¥21.2 billion due to a favorable acquisition of new policies.
- New business margin for FY17.4Q (3M) increased 0.1pt from December 31, 2017, due mainly to the change of product portfolio, despite a decrease in interest rates in Japanese yen.

### Notes:

1. Calculated MCEV as of December 31, 2017 onward by using updated economic assumptions and lapse and surrender rate from March 31, 2017.
2. New business value is calculated accumulating new business value for each month based on economic assumptions at the end of each month. The insurance risk measurement method and others have not changed for new business value and new business margin.

## ◆ About the method measuring insurance risk

- From the time it began disclosing MCEV up until the present, from the perspective of transparency and comparability Sony Life has employed a measurement method based on the EU Solvency II standard, which is a leader in capital requirements based on economic value.
- During this time, the industry has deliberated risk measurement methods and internal models. Also, Sony Life has accumulated its own experiential data related to insurance risk, as well as knowledge about this risk in relation to its internal model. As a result, the internal model has grown more sophisticated.
- For these reasons, as of March 31, 2018, Sony Life changed its method of measuring insurance risk to employ an internal model that reflects the company's own risk characteristics.

## ◆ About the cost of capital rate

- We have set a cost of capital rate conforming to an MCEV framework that takes market data into consideration. Taking the status of recent market data and trends into consideration, as of March 31, 2018, we revised the cost of capital rate for measuring MCEV as of March 31, 2018 (increasing the rate from 2.5% to 3.0%).

The following page shows the impact of these changes on MCEV and ESR and others as of March 31, 2018.

ESR	156%	227%	+71pt

- ◆ Of the MCEV impact of +¥96.6 billion, changes in capital cost rates had an impact on MCEV of negative ¥53.0 billion.
- ◆ New business value reflects such factors as a revision in the insurance risk measurement method and others from FY2018. The impact on the new business margin for new policies in FY2017 if the revised insurance risk measurement method were reflected would be +0.7 pt.

## Calculation of Consolidated Adjusted ROE

Since each company of Sony Financial Group differs by industry such as insurance and banking, each group company calculate its "Adjusted ROE" based on adjusted profit and adjusted capital to realize its corporate value and capital efficiency.

\*Consolidated Adjusted ROE = Consolidated Adjusted Profit divided by Consolidated Adjusted Capital

Consolidated Adjusted Profit = ① + ② + ③

Consolidated Adjusted Capital = ④ + ⑤ + ⑥
